

Tutorial: Basic Processing

tah@mit.edu

Overview

- In this session we will look at the processing of GPS data around the time of magnitude 5.8 aftershock to Apr 4, 2010 El Major Cucapah earthquake
- Aftershock happened at 4:26 UTC June 15, 2010 (day-of-year 166)
- Data is available on class web site:
- Processing:
 - `sh_setup -yr 2010`
 - `sh_gamit -d 2010 165 -netext z -yrex`
- More options will be tried once this run is complete.
